| No. of feeder station | 68PCS |
| No. of head | 68 nozzles |
| X,Y,Z Axes Driving | Magnetic linear motor+Fuji servo motor |

Acceptance of component range

The smallest and largest components that can be pasted by the mounting equipment shall be checked with special measuring instrument after installation, and the error between the theoretical mounting position and angle and the actual mounting position and angle shall be measured to see whether it meets the requirements of the equipment. For example, if it is specified that 01005 and IC 0.4 and bga0.3 mm spacing elements can be mounted on the machine, they should be included in the test scope at the time of acceptance.

68 head mounting, higher efficiency

The working stability of 68 nozzles is better at the same time, 68 nozzles can rotate 360 degrees at any angle, and the angle rotation linkage is completed without affecting the efficiency

Finished product graphics

Available for 5M, 50M or any length of flexible strip and roll to roll.
Calibration automatically, high precision, available for RGB.
