Product Description

led bulb 3528 rope light surface mount pick and place machine

SMT Pick and Place machine is one of the most important Machine used in Surface Mount Technology. It is also called pick and place robot.

It picks and places SMD electronic components onto the PCB prior to soldering. These machines contribute to about 50% of the total cost / price of any SMT production line.

RT-1 Details

- 1.RT-1 multi-functional pick and place machine.
 - 2.New structure design, PCB board fixed, mounted head XYZ axis movement.
 - 3.flight camera and head movement together, more accurate identification of coordinates.Faster speed;
 - 4.Panasonic original servo motor control screw, not easy to wear, high stability;
 - 5.Industrial computer control system, touch display, easy to operate; Mounting large components is faster and more stable.
- In addition, it is applicable up to 0402 chips and 42mm ICs. It has improved actual productivity and placement quality by applying high speed and high precision electrically driven feeders. Furthermore, since it is designed to be compatible with pneumatic feeders, it maximizes the customer's operational convenience.
