Product Description

Automatic glue dispenser machine easy to operate high speed machine 90000 CPH

What is the glue dispenser?

The dispenser is designed to control the fluid. The automatic machine that drips and coats the fluid on the surface of the product or the inside of the product can realize three-dimensional and four-dimensional path dispensing, precise positioning, precise control of glue, no drawing, no leakage, no glue.

The glue dispenser is mainly used to accurately point, inject, apply and drop glue, paint and other liquids in the product process to the precise position of each product. It can be used to achieve dot, line, round or arc shape.
