

Power driver full automatical multifunctional smt pick and place machine

Our Product Introduction

for more products please visit us on smtmountingmachine.com

Basic Information

- Place of Origin: China
- Brand Name: ETON
- Certification: CCC, CE, SIRA
- Model Number: HT-E8S-1200
- Minimum Order Quantity: 1 set
- Packaging Details: vacuum package, wooden case
- Delivery Time: 30 days
- Payment Terms: T/T
- Supply Ability: 50 sets/month

Product Specification

- Warranty: 12 Months
- Name: SMT Pick And Place Machine
- Application: SMT Production Line, for SMT Machine
- Power Supply: 380AC 50HZ
- Weight: 1700kg
- Usage: SMT Mounting Machine
- Type: Automatic
- Feeders: 28pcs

Power driver full automatical multifunctional smt pick and place machine

1. Mounter Introduction

Pick and place machine, also known as "Mounter" and "surface mount system", is a kind of equipment configured after dispensing machine or screen printing machine. It is a kind of equipment that accurately places surface mount components on PCB pad by moving the mounting head. It is used to realize high-speed and high-precision placement of components. It is the most critical and complex equipment in the whole SMT and production.

2. machine feature

PCB length width: max 1200*500mm

Minimum mount 0402 elements, maximum Mount Range 15mm

Mounting components: LED chip, resistor, capacitor, lens, IC, shaped components, etc

Mounting mode: Group picking and separately placing, separately picking and separately placing

3. machine parameter

PCB length width	Max 1200*500mm min 80*80mm
PCB thickness	0.5~5mm
PCB clamping	Adjustable pressure pneumatic
Camera	2 sets of imported camera
Components space	0.2mm
Conveyor transmission	1200mm
Power	380AC 50HZ
Feeding way	Electric feeder with double motor

4. Application

5. Our advantage

We have our own industrial park, covering an area of 520,000 square meters.

We have been in this business for over ten years.

We have office and local engineer in Egypt, Turkey, India, etc.

We can control it remotely, give machine a free upgrade
Free door-to-door installation by engineers

6.SMT line

HT-E8S Semi-automatic production line

Total length:11.9m

The semi-automatic production line is mainly composed of semi-automatic printing machine, pick and place machine, reflow oven and conveyor.

7.package

- 1.Our machine are packed in vacuum wooden cases, in order to prevent chemical reaction with some components during transportation, so as to better protect the machien itself.
- 2.The salesman tracks the delivery process and records the whole loading process to ensure no erro in loading.
- 3.After loading, when the goods arrive at the port, we will cooperate with the forwarder to do customs clearance procedures.

8. FAQ

Q:What is the difference between semi-automatic production line and full-automatic production line?

A:In short, fully automatic production lines are expensive, but require less labor. Semi-automatic production line is more affordable, but the labor will be more than the automatic line

Q: About technical offer

A: As for machine operation, we will arrange engineers to go to your factory for installation and teaching after you buy our machines. If you have engineers who have been involved in the installation of SMT equipment, we can teach you how to install it online.

Q:How can we buy from us?

A: Pick and place machine, smt production line, stencil printer, reflow oven, load/unload machine, feeder,nozzle,etc.

Q: This is the first time I use this kind of machine, is it easy to operate?

A: There is English manual or guide video that show you how to use machine. If you still have any question, please contact us by e-mail/ Skype/ phone/ wechat/ online service.
