

High Efficiency Glue Dispenser Machine Automatic AC220V 50HZ Magnetic Linear Motor Drive

Our Product Introduction

for more products please visit us on smtmountingmachine.com

Basic Information

- Place of Origin: CHINA
- Brand Name: ETON
- Certification: CCC/CE/SIRA
- Model Number: HT-D12
- Minimum Order Quantity: 1 set
- Packaging Details: vacuum packaging and wooden cases
- Delivery Time: 5~8 work days
- Payment Terms: L/C, T/T

Product Specification

- Warranty: 1 Year
- Application: SMD Production Line
- Power Supply: 220AV 50HZ
- Weight: 800kg
- Dimension: 1800*1050*1550mm
- Dispensing Speed: 90000CPH
- Drive Way: Magnetic Linear Motor Drive
- Software: R&D Independently
- Dispensing Accuracy: 0.1mm
- Heating Temperature: 200
- Highlight: **glue dispenser machine AC220V,
Linear Motor glue dispenser machine**

Product Description

Automatic high efficiency reliability glue dispenser machine

Production Introduction

HT-D12 is a fully automatic high-speed dispensing machine, which is mainly used for lens mounting in the SMT production line.

Dimension	1800*1050*1550mm
Total weight	800kg
Max PCB size	1200*500mm
PCB claming	Adjustable pressure pneumatic
Dispensing mode	Pneumatic injection value
No.of camera	1 set industrial camera
Dispensing accuracy	0.1mm
Heating temperature	200
Dispensing height	<15mm
Dispensing speed	90000CPH
Drive way	magnetic linear motor drive

Main features

Large size track,suitable for different size of PCB

Using Chinese and English operation interface, the operation is simple and easy to understand

High performance linear motor drive for X,Y axesensure high accuracyn in high speed

Automatic program standbystart up production rapidly,intelligent manufacturing

Large capacity SSD Industrial control systemhigh speed access ensures system response speed

Dispensing machine knoeledge

The glue dispenser is a machine and equipment used for glue dispensing and smearing. It is widely used in the electronics and LED industries. In the LED industry, it is generally suitable for mounting lenses. Dispensers specifically control fluids. Automatic equipment that drips and coats the fluid on the surface or inside of the product. It can achieve precise positioning, precise glue control, no wire drawing, no glue leakage, and no glue dripping. The glue dispenser is mainly used for the precise point, injection, coating and dripping of glue, paint and other liquids in the

product process to the precise position of each product, which can be used to achieve dots, lines, circles or arcs or other irregular lines.

FAQ

Do you have any other machines in your company?

We also provide pick and place machine ,Send board machine, PCB un-loader, conveyor, semi-automatic stencil printer and automatic stencil printer and so on.

Why we choose you company?

A:ETON has independently developed the world's first technological invention patents and proprietary technologies, including 9 invention patents, 12 software copyrights and 112 practical patents.
