#### Economic benefits:

Reduce the purchase cost of suction nozzle; after using sme-24 cleaning machine, it can solve the problem of too dirty suction nozzle and scrap, so as to extend the service life.

Reduce unnecessary labor; because the machine adopts automatic cleaning, no special person is responsible for it, and the whole process is automatically completed by the machine.

It can effectively reduce the defective rate of products and improve the productivity of SMT. In the production process, a large part of it is caused by the uneven dirt on the surface of the suction nozzle and the dirt in the inner cavity, resulting in the throwing or mounting displacement, resulting in poor subsequent welding. After using the cleaning machine, the suction nozzle can always be protected in a new state, greatly improving the production efficiency.
