

## T9-2S SMT pick and place machine with 5m,10m,100m LED No wire strip lights

### Our Product Introduction

#### Basic Information

- Place of Origin: China
- Brand Name: ETON
- Certification: CCC CE SIRA
- Model Number: T9-2S
- Minimum Order Quantity: 1 SET
- Packaging Details: Vacuum wooden box
- Supply Ability: 50 PCS/month

#### Product Specification

- Name: Pick And Place Machine
- Warranty: 1 Year
- Length: 3454mm
- Width: 3035mm
- Height: 1777mm
- Total Weight: 3100kg

## Product Description

### T9-2S SMT pick and place machine with 5m,10m,100m LED No wire strip lights

#### Product description

T9-2S led Strip SMT pick and place machine, two sets of systems, can produce two different PCB boards at the same time; four robotic arms of the placement machine, a total of 136 nozzles, and 136 feeders, the intelligent feeder has higher feeding accuracy and faster speed !

In the production line configuration, one placement machine and reflow soldering can be shared. Compared with two production lines, it not only saves the production space, but also saves a lot of investment under the same production capacity.

#### Feature

High productivity	<b>ETON Tech Adjustable Placement Head:</b> Component picking position can be adjusted according to PCB pad pitch,min 6.5mm. Apply to LED 3014/3020/2835/5050 resistor,capacitor, bridge rectifier etc.wide component range.
	<b>Unique Design Component Leaking Detection And Individual Component Refill Function:</b> Recognition camera record the component leaking position of PCB,and fill the missing component accordingly.
	<b>Ultra-high-speed Capacity:</b> The placement time greatly minimized with the improved placement way, excellent optimum capacity reach 500000CPH.
Flexible production	Adjust the conveying platform according to various roll to roll strip,range 250 ± 10mm,the max length range is 1M per cycle.
	The distance of feeder station can be flexibly adjusted to achieve group picking and group placing,so as to realize the function of two time picking and once placing.
	The range of feeding station is double of placement head,can produce four kinds of materials at the same time
	Intelligent electric feeder,supporting high-speed machine series
High performance	Automatic production with identification data,correction and fill missing component automatically.

#### Parameter

PCB size( Width*Length)	250(± 10)mm*Any length
PCB thickness	0.1 -0.5mm
Mounting way	Group picking and group placing
Mounting mode	Double rail + Four groups of placement heads
No. of camera	10 sets /Vision alignment+Mark correction
Mounting speed	Double side:500000CPH,single side:250000CPH(Optimum speed)
Power	380AC 50HZ
Power consumption	9.6KW

#### About us

ETON is not only in the leading position in the field of photoelectric high-speed mounter, but also has made a breakthrough in the field of SMT high-speed mounter. It has successfully developed a number of high-cost SMT high-speed universal mounter. Its products are widely used in lighting, display screen, electronics, driving power supply, household appliances, new energy and other industries.

### Service

After sales service refers to all the services we provide when you receive the products. We have a special after-sales department to serve you, such as guiding installation, training employees, regular follow-up, sharing industry information and so on.

#### **Before order**

We will support professional suggestion of SMT line  
We will recommend the best module according to the products  
We will supply best quotation with factory price

#### **After order**

Machine will have good test and aging before shipping  
We support machine free installation and training,  
Special time we support online training, and video teaching.

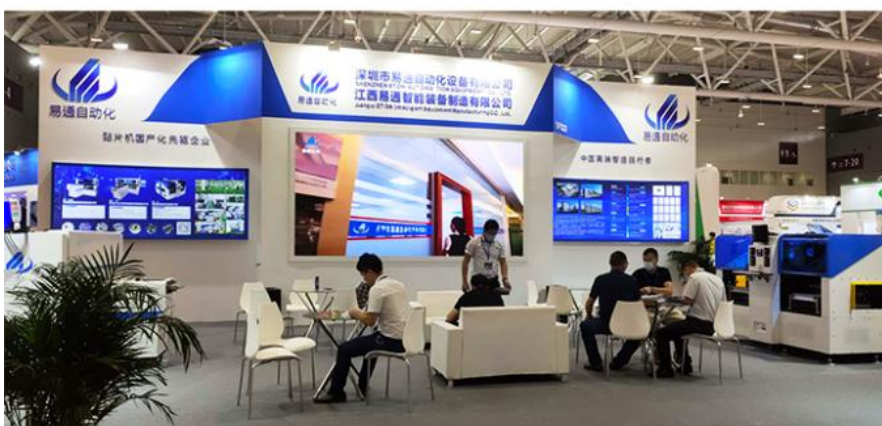

#### **ETON is Top brand of SMT machine in China**

Market share in China: 80% of large listed factories are our customers  
Our products are exported to more than 20 countries & regions

### Exhibition

Our exhibitions mainly include India exhibition, Pakistan exhibition, Thailand Exhibition, Egypt exhibition, Turkey exhibition, etc. the following are the photos of the exhibitions we have participated in and the different LED lamp manufacturers we have cooperated with.
