About motor

The Magnetic suspension technique is defined as a technique that uses Magnetic forces to hold an object in position along one or more axes.

Magnetic levitation technology system, is composed of rotor, sensor, controller and Actuator 4 parts advantages:

First,no wear, no pollution, can be used in vacuum and corrosive medium for a long time;

Second,no mechanical friction, low power consumption, low noise, high efficiency, no need for lubrication and sealing, can be used in high-speed engineering, high-speed mechanical design to solve the problem of lubrication and energy consumption.

Third,High precision, stable and reliable.

Fourth,speed is only limited by the bearing material.

FAQ:

Q: Do you have any customers in India? How many machines are there in India?

A: Yes, We have many big clients in India, Such as RK.

SURYA, Fiem.Calcom, POLYCRB, etc. We have sold over a hundred machines to India and we go to the exhibition every year.

Q: Can I pay by L/C?
