## LED Street Light SMT Making Machine Long Life For Lighting Factory

Our Product Introduction

for more products please visit us on [smtmountingmachine.com](http://smtmountingmachine.com)

### Basic Information

- Place of Origin: China
- Brand Name: ETON
- Certification: CCC
- Model Number: HT-E8S-1200

### Product Specification

- Machine Name: Led Street Light Smt Line
- Machine Model: HT-E8S-1200
- Machine Heads: 12 Pcs
- Capacity: 45000 CPH
- Highlight: 45000 CPH SMT Making Machine, Street light SMT Making Machine, lighting factory SMT Making Machine

## Product Description

### LED Street light SMT making machine

#### Machine for led street light

ETON HT-E8S-1200 is the pick and place machine/smt machine, also it is famous and good quality to using for all kinds of led lighting making, like led street light, panel light, strip light, lens, etc.

The function is mounting led chip and other SMD components on the pcb.

#### Machine features

1. HT-E8S-1200 is the multifunctional led street light board making machine, widely apply to many kind of led board and electrical board
2. Intelligent and Easy operate, this model is control by computer, software is reach and develop by ETON, it is really easy for worker to operate.
3. Long life, this machine easy for using more than 10 years
4. Using double motor electrical motor, high precision and stable.

#### FAQ

1. Which part your machine manufacturing for ?

A: Our machine is called SMT machine, It is using for producing led light board and the driver board. Not only for led street light, but also suitable for other led lamp or the driver board

2. May I have your best Price ?

A: Yes, of course, please contact us directly for best price.

#### Important part making machine—led lamp

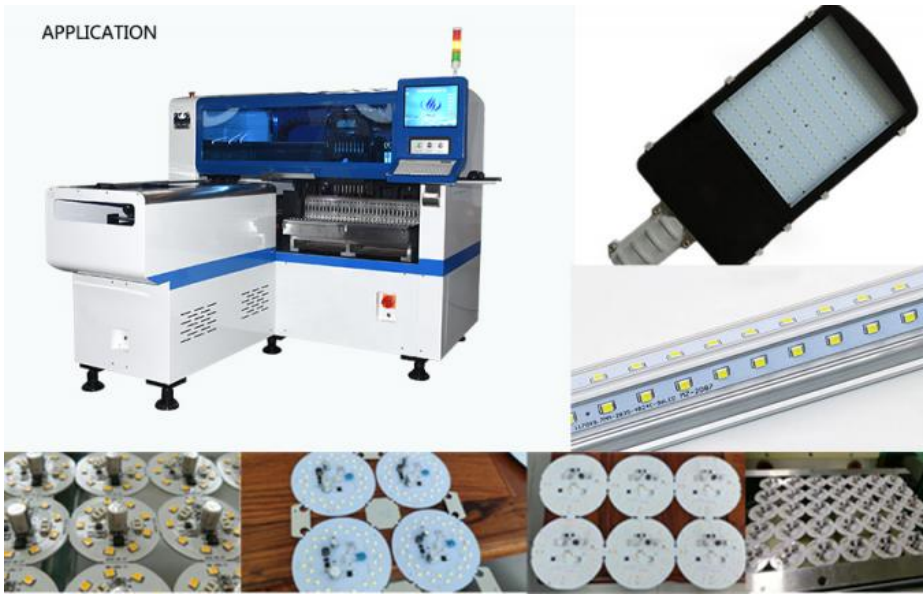

LED Street light consists of lamps, wires, light sources, lamp poles, lamp arms, flanges, and embedded parts.

Solar street light - solar street light system structure:

The solar street light system can guarantee the normal operation of the rainy weather for more than 15 days! Its system composition is composed of LED light source (including drive), solar panel, battery (including battery incubator), solar street light controller, street light pole (including foundation) and auxiliary materials and wires.

Solar cell modules generally use monocrystalline silicon or polycrystalline silicon solar cell modules; LED lamp caps generally use high-power LED light sources; controllers are generally placed in the lamp pole, with light control, time control, overcharge and over discharge protection and reverse connection protection, and more The advanced controller also has the function of adjusting the lighting time in four seasons, half-power function, intelligent charging and discharging function, etc.; the battery is generally placed underground or there is a special battery incubator, which can use valve-regulated lead-acid battery, gel battery, Iron-aluminum batteries or lithium batteries, etc. The solar lamps work fully automatically and do not need to dig trenches for wiring, but the lamp poles need to be installed on the embedded parts (concrete base).

#### APPLICATION

**Shenzhen Eton Automation Equipment Co., Ltd.**
