

Double Module SMT Pick Place Machine 10 Heads LED Mounter Machine

Our Product Introduction

for more products please visit us on smtmountingmachine.com

Basic Information

- Place of Origin: CHINA
- Brand Name: ETON
- Certification: CCC,SIRA,CE
- Model Number: YT202
- Minimum Order Quantity: 1PCS
- Packaging Details: WE USE VACUUM WOODEN BOC PACKAGE
- Delivery Time: 5-8 work days
- Payment Terms: L/C, T/T
- Supply Ability: 50PCS/Month

Product Specification

- Model: YT202
- Warranty: 1 Year,12 Months
- Name: SMD Chip Mounter,SMT Pick And Place Machine,SMT Chip Mounter,smt Nozzle
- Application: SMD Production Line,SMT Mounting Shooter Machine,SMT Production Line,for SMT Machine
- Power Supply: 380V 50HZ
- Condition: 100% Original,Brand-new
- Product Name: Place Machine\ LED Mounter\LED Assembly Machine,Automatic SMT Mounting Shooter,SMT Shooter Machine
- Weight: 1700KG
- Mounting Speed: 90000 CPH
- Usage: Circuit Board Assembly,SMT Mounting Machine,SMD,LED
- Dimension: 2317*1376*1762mm

Product Description

Pick and place machine 10 heads LED Electronics Production Machinery

Product Details

Model Number:YT202
 Dimension:2317*1376*1762mm
 Heads:20pcs
 Weight:1700kg
 Mounting Speed:90000CPH
 Power:380AC 50HZ
 Feeder:32pcs double module
 PCB size:
 MAX:500*450mm(single pcb)/500*300mm(double pcb)
 MIN:50*50mm
 PCB thickness:0.5-4.5mm
 Core Components:Motor
 Brand:ETON
 Visual camera:4set of imported camera
 Place of Origin:Guangdong, China
 Warranty :1 Year

Common electronic component

Resistance: shunt limiting, voltage dividing, converting electrical energy into internal energy, blocking current capacitance: the amount of stored electrical energy, plays an important role in tuning, by-pass, coupling, filtering, etc.

Induct-or: energy storage elements, sensors in the circuit mainly play a filter, oscillation, delay, notch, and other functions, as well as screening signals, filter noise, current stability and suppression of electromagnetic interference. AC-AC isolated DC diode: used in rectifier, isolation, voltage regulator, polarity protection, coding control, FM modulation and static noise circuits.

Unidirectional conducting

Triode: amplification signal, voltage regulator, switch. Flow control characteristics, amplifier function characteristics

transformer:voltage conversion,current conversion, impedance conversion, isolation, voltage stabilization

integrated circuits: micro-electronic devices or components, circuit function integration. Small size, light weight, less lead wire and welding point, long life, high reliability

crystal oscillator: Quartz Crystal is a clock piezoelectric crystal. When a piezoelectric crystal is squeezed or stretched in a particular direction, different charges are generated at its two ends.

Machine parts

Axis Configuration

X-axis: the mobile header component is parallel to the PCB transfer direction.

Y-axis: the moving head component is perpendicular to the PCB transfer direction.

Z-axis: controls the height of the working head assembly.

R axis: control the rotation of the nozzle axis of the working head assembly.

FAQ

Q:Do you have wave soldering machine?

A:Sorry, at present, we are the manufacturer of pick and place machine, but also provide the related SMT machine, such as reflow oven, stencil printer, conveyor, loader machine and so on.

Q:Can i visit the production site of your machines in India?

A:i have to ask my client. After all,this is our customer's factory.we cant not make decisions for my clients. I think that you wouldn't want your competitors visit your manufacturing site.please understand.
