

## ETON 500000CPH Pick And Place Machine 100m Strip Light Making Machine

### Our Product Introduction

for more products please visit us on [smtmountingmachine.com](http://smtmountingmachine.com)

#### Basic Information

- Place of Origin: CHINA
- Brand Name: ETON
- Certification: CCC, CE, SIRA, ISO
- Model Number: T9-2S
- Minimum Order Quantity: 1 set
- Packaging Details: standard wooden box package
- Delivery Time: 5-8 work days
- Payment Terms: T/T
- Supply Ability: 50 sets/month

#### Product Specification

- Product Name: Pick And Place Machine
- Pcb Size: 250(±10)\* Any Length
- No. Of Heads: 136pcs
- Optimal Speed: 500000cph
- No. Of Camare: 10sets
- The Feature Of Camera: Vision Alignment, Mark Correction
- Power Consumption: 9.6kw
- No. Of Feeder Station: 136pcs
- Highlight: pick and place machine 50W CPH , 100m strip pick and place machine, pick place strip light making machine

## Product Description

### ETON New Design 500000CPH pick and place machine for 100m strip light making

#### Description

The machine T9-2S with the high-end magnetic linear motor and servo motor which is more stable and more accurate than the step motor. The software is developed by ourselves. The software has Chinese and English versions. And our software offers free lifetime upgrades. The whole machine is guaranteed for one year. We have a professional after-sales team. As long as there is a problem with the machine within one year of purchase, we will repair it for free. If replacement parts are needed, we will send them to you for free (usually we use DHL).

#### Why choose T9-2s pick and place machine

1. ETON is currently the pioneer of high-speed placement machines in the SMT industry, with speeds up to 500000cph, and is an original high-speed placement machine manufacturer
2. The placement machine can produce flexible strips of any length, such as 5m, 10m, 15m, 25m, 50m, 75m, 100m, etc.
3. 136-head, optimal speed can reach 500000cph
4. Auto production with identification data, correction and fill missing component automatically

#### Parameter

Product name	Pick and place machine
PCB size	250(±10)mm*any length
PCB thickness	0.1-0.5mm
PCB clamping	Vacuum adsorption, cylinder clamping, track width adjustable
Mounting mode	Double rail+ four groups of placement heads
No. of camera	10 sets digital camera
Mounting height	≤5mm
No. Of heads	136pcs
Mounting speed	500000cph
Components range	Led 3014/3020/2835/5050 and resistor, capacitor, bridge rectifiers, etc
Power	380v 50hz
Power consumption	9.6kw
Feeding system	Intelligent electric feeder with double motor

#### Application

ETON T9-2S PICK AND PLACE MACHINE is mainly for making strip light, which can make roll to roll strip, like 5m, 10m, 15m, 25m, 50m, 75m, 100m, etc

## Services

### 1. Before-sales Services

Our sales-persons always professionally, patiently, and sincerely introduce, recommend, and demonstrate different model of machines for our customers, so that the customers could choose the most suitable one in terms of their budget and practical production needs.

### 2. In-sales Services

This kind of services include providing customers with one-stop SMT solutions, overall and detailed quotation, clear and standard contract. During the whole process, our sales-persons will actively communicate with the customers as to every aspect of the deal.

### 3. After-sales Services

After-sales services refers to the provision of training and guidance for our customers to operate the newly-purchased machines, the maintenance of the machines in use, and the updating of the software as well as firmware.

**Professional Team**

**Provide industry-leading SMT mouter and whole line solution**

- Technical team** | Over 50 R&D experts
- Sales team** | More than 20 international sales elites
- Services team** | Wit overseas offices and local engineers

**Q1.What's the way of shipping?**

Because these are all heavy machine, so we suggest you use cargo ship, but for the machine spare parts, if you are urgent, air transportation would be fine

**Q2. How's the training?**

After buying our machines, your engineers can go to our company or our engineers go to your factory if require, and we'll train them how to use these machines.

**Q3. Is it hard to use these machines?**

No, not hard at all. For our previous clients, at most 3-5days is enough to learn to operate the machines. Of course if your engineer still can't operate machine, our engineer will stay and train them until they know how to operate our machine and can smoothly production

**Q4. Does your machines have quality certificate?**

Our machines have passed CE certificate, ISO, CCC, SIRA, RoSH, etc certification

**Q5. How about the warranty?**

We support one year warranty, during the warranty period any parts need to repair and replace which is free. If there is any doubt in the process of operation the machine, pls feel free contact us, and we will help you in time
