

LED Light Industrial SMT Pick Place Machine Down Light / Spot Light SMT Mounter Machine

Our Product Introduction

for more products please visit us on smtmountingmachine.com

Basic Information

- Place of Origin: CHINA
- Brand Name: ETON
- Certification: CCC,SIRA,CE
- Model Number: YT202
- Minimum Order Quantity: 1PCS
- Packaging Details: WE USE VACUUM WOODEN BOC PACKAGE
- Delivery Time: 5-8 work days
- Payment Terms: L/C, T/T
- Supply Ability: 50PCS/Month

Product Specification

- Model: YT202
- Warranty: 1 Year,12 Months
- Applicable Components: SOP
- Name: SMD Chip Mounter,SMT Pick And Place Machine,SMT Chip Mounter,smt Nozzle
- Application: SMD Production Line,SMT Mounting Shooter Machine,SMT Production Line,for SMT Machine
- Power Supply: 380V 50HZ
- Condition: 100% Original,Brand-new
- Product Name: Place Machine\ LED Mounter\LED Assembly Machine,Automatic SMT Mounting Shooter,SMT Shooter Machine
- Weight: 1700KG
- Mounting Speed: 90000 CPH
- Type: Automatic
- Usage: Circuit Board Assembly,SMT Mounting

Product Description

SMT pick and place machine in led light industrial for down light and spot light

Details

Showroom Location: Turkey, India
 Video outgoing-inspection: Provided
 Machinery Test Report: Provided
 Warranty of core components: 1 Year
 Core Components: R&D by Eton
 Place of Origin: Guangdong, China
 Brand Name: ETON
 Model Number: YT202
 Warranty: 1 Year, 1 year
 Place of origin: China
 Dimension: 2317*1376*1762mm
 Total weight: 1700kg
 Power: 380AC 50HZ
 Power consumption: 6KW
 Mounting speed: 90000CPH
 Mounting height: ≤20mm
 Visual camera: 4sets of imported camera
 After Warranty Service: Video technical support, Online support
 Local Service Location: Turkey, India
 After-sales Service Provided: Video technical support, Online support

About down-light

A down-light lamp is a lamp with a screw head that can be directly fitted with a self-contained lamp or an energy-saving lamp. Jane lamp is a kind of lighting fixture which is embedded in the ceiling. Built into the ceiling of the recessed luminance, all the light is projected down, spread in the direct light distribution. You can use different reflectors, lenses, straight-out windows, light bulbs, to achieve different light effects. Jane lamp does not occupy space, can increase the soft atmosphere of space, if you want to create a warm feeling, can try to install more blue Jane lamp, reduce the pressure of space. Generally in hotels, homes, cafes, the use of more simple lights and spotlights many people are confused, do not know what the difference between these two types of lamps, to be applied to the home where the location, and the effect of the application is different. In short, the simple lamp is a light relative to the general Ming-installed lamps more focused lamps, is generally used for general lighting or shaft lighting.

Spotlight

A spotlight is a highly focused light fixture that illuminates with a specific target that can be specified. Mainly used for special lighting.

We distinguish the simple lamp from the spot lamp in these aspects.

1. From the point of view of the light source, Jane lamp can be installed incandescent bulbs, but also can be installed energy-saving lamps. White dam lights are yellow when installed. Depending on the type of bulb, the cf-ls can be white or yellow. And the direction of the light source of the general spotlights can be freely adjusted. From the point of view of the application, the lamp is usually installed in the ceiling.
2. Of course, the Jane Lamp also has an external type. Simple lighting is a good option in areas with no-collar or chandelier lighting, where the light is softer than the spotlights. Spotlights can generally be divided into track-type, point-hanging type and type of rice and so on. Spotlights usually have inter changers, but there are no inter changers. Inline spotlights can be installed in the ceiling, such as TV wall, accessories, etc. .
3. From the price point of view, the same grade, spotlights are more expensive.
4. The biggest characteristic of down-light from the installation position is to keep the whole unity of architectural decoration, not because of the installation of lamps and lanterns and destroy the unity of ceiling art. The Jane lamp does not occupy the air direction. Spotlights are mainly installed around the ceiling or the upper part of the furniture, or placed in the wall, wainscot or skirting line. Used to highlight the sense of hierarchy, making atmosphere, can play a leading role on the overall lighting, but also local daylight.
