

Automatic SMT Pick And Place Machine In LED Light Industrial For LED Display

Our Product Introduction

for more products please visit us on smtmountingmachine.com

Basic Information

- Place of Origin: CHINA
- Brand Name: ETON
- Certification: CCC,SIRA,CE
- Model Number: HT-E8D-1200
- Minimum Order Quantity: 1PCS
- Packaging Details: WE USE VACUUM WOODEN BOC PACKAGE
- Delivery Time: 5-8 work days
- Payment Terms: L/C, T/T
- Supply Ability: 50PCS/Month

Product Specification

- Model: HT-E8D-1200
- Warranty: 1 Year,12 Months
- Applicable Components: SOP
- Name: SMD Chip Mounter,SMT Pick And Place Machine,SMT Chip Mounter,smt Nozzle
- Application: SMD Production Line,SMT Mounting Shooter Machine,SMT Production Line,for SMT Machine
- Power Supply: 380V 50HZ
- Condition: New,100% Original,Brand-new
- Product Name: Place Machine\ LED Mounter\LED Assembly Machine,Automatic SMT Mounting Shooter,SMT Shooter Machine
- Weight: 2500KG
- Mounting Speed: 90000 CPH
- Type: Automatic
- Usage: Circuit Board Assembly,SMT Mounting

Product Description

Automatic production machinery line SMT pick and place machine in led light industrial for led display

Product Details

Model Number:E8D-1200
 Dimension:3150*2250*1650mm
 Heads:24pcs
 Weight:2500kg
 Mounting Speed:90000CPH
 Power:380AC 50HZ
 Feeder:48pcs double module
 Core Components:Motor
 Brand:ETON
 Visual camera:4set of imported camera
 Place of Origin:Guangdong, China
 Warranty :1 Year
 Machinery Test Report:Provided
 Delivery:Within 30 Days
 Supply Ability:50 Sets per Month

About led display

1. The definition of an LED display an LED display is a Flat panel display device that consists of small LED modules that display text, images, videos, and other information. • LED electronic display is a combination of microelectronics, computer technology and information processing. It has many advantages, such as bright colors, wide dynamic range, high brightness, long life and stable operation. LED displays are widely used in commercial media, cultural performance markets, stadium, and information dissemination. Press releases, securities trading, etc. , can meet the needs of different environments.

Composed

The LED display screen is an electronic display screen which is composed of LED lattice. The content form of the screen such as text, animation, picture and video can be changed in time by lighting up and turning off the red and green light beads, modular rocket control. It is mainly divided into display module, control system and power supply system. The display module is LED light dot matrix to form the screen lighting division, and the control system is to control the lighting of the area meat to realize the content of the screen display, the power supply system transforms the input voltage and current to meet the needs of the display screen.

SMT automatic production line

SMT production line main equipment: Printing Machine, SMT machine, reflow soldering, wave oven, Prospect

With the development of IC packaging in the direction of high integration, high performance, multi-lead and narrow spacing, it promotes the application of SMT technology in high-end electronic products, there are many technical difficulties. Since 1998, BGA devices have been widely used, especially in the communication industry. The proportion of BGA devices has been increasing rapidly. At the same time, SMT technology is driven by high-end products such as communication, entered a rapid, good development period.
