Big LED factory LED Bulb DOB SMT mounter machine

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: ETON
- Certification: CCC
- Model Number: HT-E8D-600

Product Specification

- Machine Name: Pick And Place Machine
- Machine Application: Led Lighting Board And Electrical Product
- Capacity: 90000 CPH
- Max Pcb Size: 600*300 Mm

for more products please visit us on smtmountingmachine.com

Product Description

Big LED factory SMT mounter machine

HT-E8D-600 double head mounter

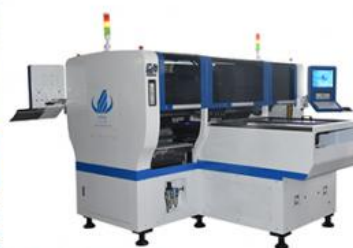

This is the parameter of ETON HT-E8D-600 mounter:

Model	HT-E8D-600	PCB Max length	600mm
Length	1950 mm	Pcb Max Width	300mm
Width	2250 mm	PCB Thickness	0.5-5mm
Height	1650 mm	PCB clamping	Adjustable pressure pneumatic
Total weight	2200 kg	Power	380 AC 50 HZ
No.of heads	24 pcs	Power consumption	8 kw
Mounting speed	90000 CPH	No.of camera	4 sets
Suitable for mounting led chiips, capacitors, resistor, IC, shaped components, etc			

Features of HT-E8D-600 pick and place machine

HT-E8D-600 is much competitive series in ETON Product list.

1. It is the high speed mounter machine with 24 pcs mounting heads. Theoretical speed could reach 90000 CPH.
2. It could satisfy different product manufacturing require, from the normal led product to the shaped components lens, transformer mounting, seperatly motor control each mounting heads make machine more intelligent and high precision
3. It is using good quality main parts which are guarantee the machine quality.
4. Most important is this mounter model is very stable with big market prove.

Pick and place machine

APPLICATION OF ETON HT-E8D-600

HT-E8D-600 is a hot model pick and place machine, widely apply to many kind of LED product and the electrical board. Such as LED Tube/LED Panel/LED Bulb/ETC

What should I do for prepare smt room ?

This is the common question for many new manufacturing by using smt. Actually, smt manufacturing is easy for start. The raw material need to prepare mainly included:

1. Necessary material prepare: LED Chip / smd components/ pcb/ solder paste/stencil
2. Prepare a UPS or regulator, wire (4 square millimeters)
3. The preparation of plant: This device should be placed on a flat, solid and dustproof ground with AC
4. Prepare the whole smt line machine which are suitable for your product
5. Operator for training
