The characteristic of lamp

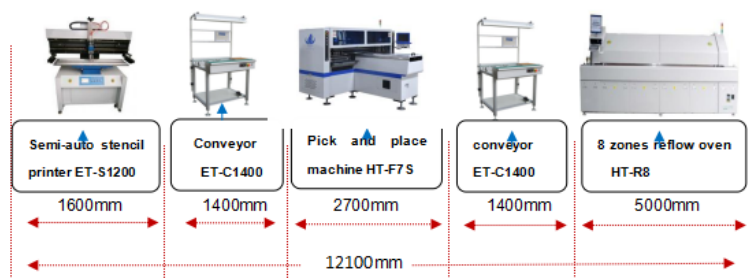

Smt is that the length of lamp bead plate is needed to mount the lamp bead on the SMT SMT, and the resistor, capacitor and other surface mount components on the circuit board are needed to mount the lamp bead on the Smt Smt, the length of the lamp bead plate is needed to mount the lamp bead on the SMT, and the resistance, capacitance and other surface mount components on the circuit board are needed to mount the lamp bead on the SMT, there are higher requirements for length. The lengths are: 0.6m, 0.9m, 1.2m, 1.5m, 1.8m, 2.4m, so we generally recommend HT-E8S and HT-F7S.
