## Product Description

### Semi-Automatic stenci pinter machine in SMT production line with led light

#### Semi-automatic printing machine

Working principle: use steel mesh to leak solder paste onto the bonding pad of PCB board to prepare for the action of component mounting

In the semi-automatic SMT production line, the printing press is located at the front end, and in the full-automatic SMT production line, the printing press is located behind the loading machine

The selection of printing press is mainly determined by the size of PCB, and we support customization
