

Double Head LED Chip Mounter Machine High Speed For LED Tube

Our Product Introduction

Basic Information

- Place of Origin: CHINA
- Brand Name: ETON
- Certification: CCC
- Model Number: F7S

Product Specification

- PCB Thickness: 0.5-5mm
- Machine Name: LED Tube Mounter Machine
- Mounting Height: No More Than 5mm
- Mounting Speed: 150000~180000 CPH
- Highlight: led tube LED chip mounter machine, Double Head LED Chip Mounter Machine, LED tube mounter machine

Product Description

LED chip mounter machine for led tube

F7s High speed led tube chip mounter machine

F7S is double mounting head high speed led chip mounter machine, it is suitable for producing:

LED Tube

LED Strip light

LED Panel light

Other led lighting board

LED light tube refers to the light tube that uses LED as the light source. Compared with fluorescent tubes, it is more energy-saving, cheaper, longer life, drop-resistant and simple in structure. It is a good substitute for fluorescent tubes in the future.

Machine parameter

Here are the machine main parameter

PCB Length Width: Max:1200*330mm Min:100*100mm

PCB Thickness: 0.5-5mm

PCB Clamping: Adjustable pressure pneumatic

Mounting Mode: Group picking and separately placing

Mounting Height: ≤5mm

Mounting Speed: 150000~180000 CPH

Components: LED 3014/ 3020/ 3528/ 5050 and capacitors, resistors, bridge rectifiers, etc.

Machine features

F7S mounter is high speed , high capacity with 34 mounting heads

It is suitable for mounting four different smd components at the same time

More intelligent with the upgrade with the camera and the head control design

Suitable for max pcb size: 1200*330mm, meet most of led lamp manufacturing

Machine picture

High speed led strip mounter

Service

Provide online service and the intelligent line design according to client's feature

Machine free upgrade for the software

Engineer on door service for machine install and training.

RFQ

Do you sell oven machine ?

A: Yes, we could supply whole smt line according to your inquiry

Could it display with the English interface ?

A: Yes, support the Chinese and English interface

We want to add a high speed multifunctional mounter machine for producing DOB, LENS Lighting board, Led tube, panel light, led display, do you have machine recommend?

A: Yes, we have high speed and intelligent mounter machine could produce the product you want.

4. What size of led tube could made?

A:The specifications and models of the lamp tube, if according to the traditional method, there are T4, T5, T8, and T9, T10.

The T here means that the shape of the fluorescent tube is tubular. The numbers behind represent its length, for example, some are 26×600 mm, and there are 26×900 mm, 26×1200 mm or 26×1500 mm. Different lamp specifications have different diameters. If you choose a T5 lamp, the diameter is 16 mm, and the diameter of the T4 lamp is 12.7 mm.

Above led tube all suitable for produce
