Details of SMT Stencil Printer

The correction method adopts the movement of the net support arm to coordinate the X, Y, Z correction adjustment of the printed matter (platen), and the correction is convenient and simple.

Using microcomputer PLC control, Human-machine interface touch control, Single/double printing and manual/semi-automatic modes can be selected.

The squeegee seat can be adjusted back and forth, and the printing squeegee can be adjusted by $\pm 15^\circ$ according to the needs of product printing.

Using air cylinder and magnetic proximity switch, the worktable reciprocates, the accuracy of the printing surface can reach $\pm 0.01\text{mm}$.
