Product Description

Efficient SMT connect device 1400*350mm for PCB conveyor

Description

The conveyor is used for connection between SMT production lines, and can also be used for PCB buffering, inspection, testing or manual insertion of electronic components.

Conveyor generally includes: a rack, two conveyor belts that rotate in parallel on the rack, the circuit board is placed on the two conveyor belts for transportation, and the existing conveyor belts are generally fixed on the rack, so that the two The width of the circuit boards conveyed on the conveyor belt is limited, so that it is not convenient to convey circuit boards of different sizes, so that the applicability of conveyor is low.
