

## LED Bulb Light SMT Surface Placement Machine For LED Lighting Board / Eletrical Board

### Our Product Introduction

#### Basic Information

- Place of Origin: China
- Brand Name: ETON
- Certification: CCC
- Model Number: HT-E8D-600

#### Product Specification

- Machine Name: Pick And Place Machine/led Lighting Production Line
- Application: LED Lighting Board And Eletrical Board
- Line Capacity: 90000 Cph
- Warranty: One Year
- Highlight: **Bulb Light Surface Placement Machine, LED Bulb Surface Placement Machine, CCC Surface Placement Machine**

## Product Description

### LED Bulb Light SMT Surface Placement Machine

#### LED Bulb light type

LED Bulb have many different type design. With bulb size, could be classify to be A15/A21/G25etc. With Base type, could be E26/ E27/B22/E12/E14etc. With consumption power, could be classify to be 3W/5W/7W/9W/12W/Etc. Many different type of led bulb.

So how to make so many different type of led bulb by one SMT Line ?

Cause SMT Line function is mounting led chip or other smd components on the pcb. The finished product is the pcba. So no matter which type of led bulb, the lighting board design and the driver design is same components. One smt line could widely apply to different pcb design and the size. So that is why we could it multifunctional mounter machine. Besides led bulb manufacturing, this model also could be produce other type of led lighting board and the driver board.

#### Machine Parameter

This Mounter machine HT-E8D-600 Main paramter:

Product name	SMT surface placement machine/Mounter/Pick and place machine
Product model	HT-E8D-600
PCB size	Max:600*300mm Min: 100*100mm
PCB thickness	0.5-5mm
PCB clamping	Adjustable pressure pneumatic
Mounting speed	90000CPH
Feeding way	Electric feeder with double motor
X,Y,Z Axis drive way	High-end magnetic linear motor and servo motor
Power	380 AC 50 HZ
Power consumption	8 KW

#### APPLICATION-DOB Series

#### APPLICATION-Other Series

#### Machine Operate

For most of client, machine operate is the big problem. But for SMT Line, it is more intelligent equipment. Machine is control by the indutrial computer, and the software is Reach and development by ETON. Client mainly need to leran how to programming and the daily maintainance. Also we support remot machine control for client who have the operate problem.
