FAQ

Q1: What is your machine actual speed?

A1: The actual speed is influenced by many factors, such as the number of the components, the kind of products, the time of send board, etc. So we can't give you the accurate actual production capacity. Such as for RT-1, the speed of led chip mainly around 23000-25000CPH. But for driver will be different.

Q2: Does the price include spare parts(nozzle and feeder)?

A2: Different client has different requirements on spare parts, it is not fair to clients to add in equivalent price for spare parts, so we don't add the spare parts on price. And price is only for machine.

Q3: Can you support whole SMT line?

A3: Yes, we can provide whole line solution if you want. We are very professional on SMT field.
