

380V 50HZ SMT Chip Mounter Machine For Flexible Roll To Roll Strip PCBA

Our Product Introduction

for more products please visit us on smtmountingmachine.com

Basic Information

- Place of Origin: CHINA
- Brand Name: ETON
- Certification: CCC,SIRA,CE
- Model Number: HT-T9-2s
- Minimum Order Quantity: 1PCS
- Packaging Details: WE USE VACUUM WOODEN BOC PACKAGE
- Delivery Time: 5-8 work days
- Payment Terms: L/C, T/T
- Supply Ability: 50PCS/Month

Product Specification

- Model: HT-T9-2S
- Warranty: 1 Year
- Name: SMD Chip Mounter, SMT Pick And Place Machine, SMT Chip Mounter
- Application: SMD Production Line, SMT Mounting Shooter Machine, SMT Production Line
- Power Supply: 380V 50HZ
- Condition: 100% Original
- Product Name: Place Machine\ LED Mounter\ LED Assembly Machine, Automatic SMT Mounting Shooter, SMT Shooter Machine
- Weight: 3100kg
- Mounting Speed: 500000 CPH
- Usage: Circuit Board Assembly, SMT Mounting Machine
- Dimension: 3454*3035*1777MM
- Feeder: 136pcs

Product Description

SMT chip mounter machine produce any length flexible roll to roll strip PCBA

Specification

Length:3454mm
 Width:3035mm
 Height:1777mm
 Weight:3100kg
 PCB thickness:0.1-0.5mm
 Model Number:T9-2S
 Heads:136pcs
 Weight:3100kg
 Mounting Speed:500000CPH
 Power:380AC 50HZ
 Feeder:136pcs
 Mounting height:<5mm
 PCB size:250*any length
 Transmission speed:>500mm/sec
 Core Components:Motor
 Brand:ETON
 Visual camera:10set of imported camera
 Place of Origin:Guangdong, China

About led chips

Led (light emitting diode) , LED lamp is the light-emitting diode of the acronym LED, which is a popular name. catalogue

1. Straight-in small power specifications are: Straw Hat/helmet, round head, concave, oval, square (2 * 3 * 4) bullet, flat head, (3/5/flat head/Bread Type) piranha and so on.
2. SMD patches are generally divided into (3020/3528/5050 these are positive light emitting)/1016/1024 and so on these are side light emitting sources.

High-power LED can not be classified into the chip series, their power and current use are different, and photoelectric parameters vary greatly. A single high-power LED light source, such as no heat sink base (usually hexagonal aluminum base) , its appearance is not much different from the ordinary patch, the high-power LED light source is circular, the packaging method is basically the same as the SMD patch, however, there are essential differences between SMD and SMD in terms of GE conditions/environment/effects, etc.

Product features

1. Voltage: LED bulbs use a low-voltage power supply, between 2 and 4 volts, depending on the product, so it is driven by a more secure than high-voltage power supply, especially for public places;

2. Current: working current in 0-15 Ma, brightness with the increase of current brightens
3. Efficiency: use 80% less energy than incandescent bulbs with the same light efficiency.
4. Serviceability: very small, each unit LED chip is 3-5mm square, so can be made into a variety of shapes of devices, and suitable for volatile environments.
5. Response time: the response time of incandescent lamp is millisecond, and that of LED lamp is nanosecond.
6. Environmental pollution: no harmful metal mercury. 7. Color: color can be changed by changing the current, and the light-emitting diode can be conveniently modified by chemical methods to adjust the band structure and band gap of the material to achieve multi-color red, yellow, green, blue and orange luminescence.

Application range

Led lamp beads are widely used in lighting, LED large-screen display, traffic lights, decoration, computers, electronic toys and gifts, switches, telephones, advertising, urban luster engineering and many other production areas

FAQ

Q: Why their machine price is so much lower than yours?

A: You said that there are some peeling machines cheaper than us on the market, which does exist, but their selling point is price, and our selling point is quality. We can guarantee you the quality of ETON pick and place machine, and the value is far more than our price.

Q: Can you help me find raw material suppliers ?

A: OK, I will try my best to find for you, will let you know as soon as I find it, friend.

Q: where I get the other material?

A: For the other parts, you need to find the corresponding supplier. We only provide SMT machine.

Q: I want to discuss with you about the assembly machines

A: I would advise you not to buy assembly lines yet because assembly lines are very expensive, it can be assembled manually first.
