

LED Flood Light SMT Making Machine 90000 CPH Mounting Components

Our Product Introduction

for more products please visit us on smtmountingmachine.com

Basic Information

- Place of Origin: China
- Brand Name: ETON
- Certification: CCC
- Model Number: YT202

Product Specification

- Machine Name: Pick And Place Machine
- Function: Mounting Components On The Board
- Capacity: 90000 CPH
- No.of Heads: 20 Pcs
- Highlight: **LED Flood Light SMT Making Machine,
Mounting components SMT Making Machine,
90000 CPH SMT Making Machine**

Product Description

LED Flood light SMT machine

Machine features

Pick and place machine features as follow showing:

1. Two mounting heads, produce two led lighting board at the same time with high capacity---90000 CPH
2. Using high precision magnetic linear motor, could have longer lifetime
3. Independently reach and development software system
4. The placement head adopt independent vacuum detection, improve placement performance.

Machine parameters

1. Max PCB size:500*300mm
2. PCB Thickness:0.5-4.5mm
3. PCB clamping support cylinder clamping, track width adjustable
4. 4 sets of digital camera, head flight vision recognition component
5. 20 PCS Mounting heads
6. Suitable for 0201-10mm packages and IC etc.

Power of manufacturing

ETON as the manufacturer of smt machine in China. We have more than 50000 sq meters industry park, as the biggest manufacturer in China, our machine already exported more than 30 countries, like Egypt, India, Turkey, Spain, etc

Also we have independtly reach and development technical team.

FAQ

1. Do you have machine for led tube chip mounting

A: Yes, we have super high speed led chip mounter machine, suitable for mounting different led modules, such as led tube, led panel, led bulb, strip light, etc

2. I want to have a whole solution, do you provide whole line?

A: ETON is the manufacturer of smt machine in China. We supply whole smt line, included the printer, mounter, oven machine, etc. But not included the skd assembly line.

3. May I have more details about your machine?

A: Of course, welcome contact us now!

YT202 is the double heads smt mounter machine, it's function is mounting smd components on the pcb, Widely apply to many kind of led lighting board and electrical board

LED Flood light

LED Flood light is one types of LED Lamp, it is hot market in this industry. our machine features is mounting the smd components on the board, than support the plate for lighting and driver.

Besides this led flood light, also ETON machine is suitable for many kind of other led lamp and the driver board. Max pcb size could be customized to be 1500mm Length. And max components height also could be customized to be 20mm. ETON company is strong for R&D according to clients product inquiry.

In order to highlight the appearance of the building, or to highlight the advertisements set on the building, people usually use lamps to project their lights onto the walls or advertisements of the building, so that people can clearly see in the dark environment. See buildings or advertisements, and such lamps are commonly known as wall washers. The existing LED wall washer, also known as a linear LED flood light, usually consists of a lamp body, a lampshade and an LED lamp. The LED lamp is installed in the lampshade, and the lampshade is installed in the lamp body.

ETON SMT Machine is suitable for mounting all kinds of led chip and other SMD components on the PCB to finish the lighting board or the driver board.
