

SMT chip pick and place machine in led industry for PCBA soft strip light roll to roll

Our Product Introduction

for more products please visit us on smtmountingmachine.com

Basic Information

- Place of Origin: CHINA
- Brand Name: ETON
- Certification: CCC,SIRA,CE
- Model Number: HT-T9-2s
- Minimum Order Quantity: 1PCS
- Packaging Details: WE USE VACUUM WOODEN BOC PACKAGE
- Delivery Time: 5-8 work days
- Payment Terms: L/C, T/T
- Supply Ability: 50PCS/Month

Product Specification

- Model: HT-T9-2S
- Warranty: 1 Year,12 Months
- Name: SMD Chip Mounter,SMT Chip Mounter
- Application: SMD Production Line,SMT Mounting Shooter Machine,SMT Production Line
- Power Supply: 380V 50HZ
- Condition: 100% Original,Brand-new
- Product Name: Place Machine\ LED Mounter\LED Assembly Machine,Automatic SMT Mounting Shooter,SMT Shooter Machine
- Weight: 3100kg
- Mounting Speed: 500000 CPH
- Type: Automatic
- Usage: Circuit Board Assembly,SMT Mounting Machine,SMD,LED
- Dimension: 3454*3035*1777MM

Product Description

SMT chip pick and place machine in led industry for PCBA soft strip light roll to roll

Specification

Length:3454mm
 Width:3035mm
 Height:1777mm
 Weight:3100kg
 PCB thickness:0.1-0.5mm
 Model Number:T9-2S
 Heads:136pcs
 Weight:3100kg
 Mounting Speed:500000CPH
 Power:380AC 50HZ
 Feeder:136pcs
 Mounting height:<5mm
 PCB size:250*any length
 Transmission speed:>500mm/sec
 Core Components:Motor
 Brand:ETON
 Visual camera:10set of imported camera
 Place of Origin:Guangdong, China

Basic acknowledge of led soft strip

LED light strip also called LED soft strip, LED light strip, LED flexible strip, LED soft strip. At present, LED soft light belt is not only used in the field of indoor decorative lighting, but also in the field of urban lighting, landscape lighting, commercial lighting and some special lighting, which is only used in the field of indoor decorative lighting, at the same time also in the city lighting, landscape lighting, commercial lighting.

As an energy-saving and environment-friendly lighting product, the LED soft lamp belt has made great progress through continuous debugging and development, gradually meet the requirements of different lighting places and environments, a wide range of applications.

Assessment of soft lamp bands

1.Evaluate the number of beads

2.and light-emitting angle of LED lamp with soft lamp

LED strip number of LED lights: 30 lights, 48 lights, 60 lights, 120 lights refers to the length of LED strip every meter of the number of LED welded LED components, generally speaking, 1210 standard strip is 60 chips per meter, the 5050 standard is 30 chips per meter, and the special one is 60 chips per meter. Different LED quantity of LED soft light belt price is different, this is to distinguish the LED soft light belt price is an important factor. Led soft light with different colors will have different luminous intensity, commonly used unit is MCD, the higher the value, indicating the greater luminous intensity, that is the brighter.

General purpose LED soft light with components on the luminous angle is 120 degrees. The bigger the angle. The better the astigmatism. On the contrary, the brightness of its luminescence is correspondingly reduced. Light angle is small, the intensity of light is up, but the scope of exposure will be reduced.

After purchasing service

1. You will enjoy a one-year warranty period, and any damaged parts will be replaced free of charge during the warranty period
2. we will send engineers to install the machine free of charge and train employees, no matter which country you are in, no matter how far you are
3. We will provide free software upgrades for life, reduce your future investment, and keep your production at the forefront of the industry. Eton's mission is to create value for the society and create benefits for customers, ETON is the best partner of LED.
