Product Description

Semi-Automatic stenci pinter machine

Semi-automatic printing machine
Working principle: use steel mesh to leak solder paste onto the bonding pad of PCB board to prepare for the action of component mounting
In the semi-automatic SMT production line, the printing press is located at the front end, and in the full-automatic SMT production line, the printing press is located behind the loading machine
The selection of printing press is mainly determined by the size of PCB, and we support customization
