

LED Soft Strip Light Shearing Machine LED Edge Cutting SMT Production Line

Our Product Introduction

for more products please visit us on smtmountingmachine.com

Basic Information

- Place of Origin: CHINA
- Brand Name: ETON
- Certification: CCC, CE, SIRA
- Model Number: ET-500
- Minimum Order Quantity: 1 set
- Packaging Details: standard wooden box package
- Delivery Time: 5-8 work days
- Payment Terms: T/T
- Supply Ability: 50 sets per month

Product Specification

- Product Name: LED Automatic Strip Shearing Machine
- Usage: LED Edge Cutting
- Weight (KG): 80KG
- Power: 100w
- Efficiency: About 10000 Meters Per Hour, Light Bar ,about 900 Puzzle Board
- Advantage: Automatic ,save The Artificial ,speediness
- Highlight: **soft strip shearing machine,
strip light shearing machine,
LED Edge Cutting SMT Production Line**

Product Description

LED soft strip light shearing machine in SMT machine production line

5m strip light assembly machine

LED board cutting machine (edge trimming machine) Function: cut off the excess board edge, improve the speed and quality of the board soldering

↓↓

LED flexible light strip board soldering machine Function: instead of labor, high efficiency, good consistency, full solder joints

↓↓

LED Whole Board Adhesive Adhesive Machine Function: Unlimited board length, whole board adhering, optimizing process, providing efficiency and quality

↓↓

LED flexible light strip reeling machine Function: A must-have tool for flexible light strips

Introduction of products:

At present the industry upgrading process, many customers use lights connected to the 5 meter board solder, improve product quality and improve production efficiency, but the consistency of light bar edge width requirements higher, easy to strip butt welding plate, solve weld, false welding, welding fracture problems. Automation equipment R & d after repeated tests, the grand launch of ET-550 plate with double-sided adhesive machine.

Product parameter:

Efficiency: about 10000 meters per hour, light bar, about 900 puzzle board;

Gas source: 0.4-0.65Mpa;

Voltage: 220V 50-60HZ;

Power: 100W;

Machine size: Length 1500MM, Width 350MM, Height 900MM

Product features:

High efficiency: hourly capacity of 10000 meters, about 900 puzzle board;

High quality: plate lamp, strip edge, incision uniformity, easy to light strip welding position, convenient positioning;

The provincial Manual: a machine can replace the 3 manual workload;

Easy to operate: the lamp positioning, convenient, fast, efficient, single operation;

Reduce costs: equipment one-time investment, long-term use;

FAQ:

I want to start this business, but I don't have any experience, how can you help me?

A: We have been in the smt industry for more than ten years and have rich experience in building LED factories. We can provide one-stop support and services from factory construction to raw material procurement to related equipment procurement to factory production.

I want to start this business, but I don't have enough funds, how can you help me?

A: We will provide the machine solution that best fits your current capacity and budget. Manual or semi-automatic machines

I have been in this business for several years, but the production capacity has been very low, how can you help me?

A: How efficient are your employees? Is your machine stable? How do you test and age products? How is the market feedback on your product quality?

My factory has been opened and the equipment has been bought. Can you give me any suggestions for upgrading my company?

A: Please send me your current production equipment pictures and on-site production videos. Manual operations can be upgraded to flow belt line operations, manual machines can be upgraded to semi-automatic or fully automatic machines, and single station machines can be upgraded to multi-station machines.

I bought your machine, but I can't install and operate it, how can you help me?

A: You can arrange your engineer to take your samples to our company for production demonstration, training how to install, operate and maintain the equipment. And we also can provide engineers to your factory for installation and training service.

Although your engineers have completed the installation and training in our company, how can I solve it if the problems of equipment appears again after returning to China?

A: First, we can provide online WeChat and video remote instruction, and ship the spare parts. After this series of operations, the problem has not been resolved, we will send engineers to your company to provide on-site services.
