

SMT Solder Paste Mixer Machine Automatically AC 220V 50Hz 60Hz

Our Product Introduction

for more products please visit us on smtmountingmachine.com

Basic Information

- Place of Origin: CHINA
- Brand Name: ETON
- Certification: CCC

Product Specification

- Machine Name: Solder Paste Mixer
- Dimension: 400x400x420mm
- Weight: About 35KG
- Operating Voltage: AC 220V 50Hz 60Hz >60W
- Operating Speed: Motor 1350 RPM Revolution: 1000RPM
Rotation: 500PRM
- Stiring Time: 1-99 Minute Digitally Adjustable
- Highlight: **Automatical solder paste mixer machine,
AC 220V solder paste mixer machine,
SMT solder paste mixer**

Product Description

SMT solder paste mixer machine automatically

Application

Solder paste mixer is applied to the SMT Line, its function is mixing the solder paste automatically. The stirring method using revolution and rotation to generate centrifugal force is a kind of non-contact stirring. You can directly take a can of 500g solder paste out of the refrigerator without warming up, put it in and stir immediately without opening it. After 2-3 minutes, the effect of returning to temperature, stirring and defoaming can be achieved.

And it saves the time and the labor cost for factory, small machine but big function.

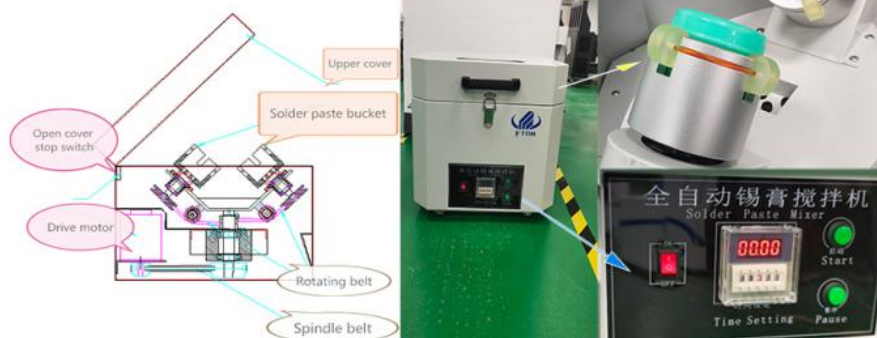

The purpose of warming up is to make the temperature of the solder paste roughly the same as that of the room, so that there will be no temperature difference during use and absorb moisture in the air.

The purpose of stirring is: because the solder paste is made by stirring tin powder, solder paste and solvent, the heavier metal powder will sink to the lower part, while the lighter solvent will float on the surface of the solder paste, which is why the reason why the surface of the bottle of solder paste that has not been stirred will be covered with oily things after opening.

Stirring enables the tin powder and solvent components to be fully mixed evenly, and can play a greater role in soldering.

SOLDER PASTE MIXER

CONTACT JOY: 008613590151025

Machine main parameter:

Machine dimension: 400*400*420 mm

Machine weight is about 35KG

Operation speed is Motor 1350 RPM, revolution is 1000RPM, Rotation is 500PRM

It is suitable for 500G, Syringe, red plastic tube, etc, the fixture can be customized

No gas problem

Fixtures are suitable for all kinds of 500g packaging solder paste cans, also mixing time can be set arbitrarily

Support manual speed control function
