Product Description

High Speed 250000CPH Pick And Place Machine For Flexible Strip And Tube Light

Description of HT-F9 Pick and place machine

Dual arm magnetic linear LED high-speed pick and place machine, Producing 4 types materials at the same time, capacity reach 250000 CPH. The SMT machine uses the suction nozzle on the head to absorb various components from feeders and mount them on the PCB board. SMT pick and place machine is the main equipment in SMT production process, which can not be replaced by other equipment. SMT production process is the solder paste coating, component mounting, reflow welding, it is the most major process in the SMT production process. In order to get good mounting quality, SMT pick and place machine should have good mounting process in addition to good equipment.
