Product Description

LED Bulb Making Smt Mounter YT202S 80000CPH With 20 Nozzles LED Making Machine

Product description

YT202S SMT pick and place machine, The theoretical speed of YT202s is 80000 CPH, First of all, from the appearance of the machine, these two modules are roughly the same. The biggest difference is that yt202s has two mounting heads. When the machine works, they work for two different PCBs respectively. Two products can be produced at the same time. One side stops working and the other side continues working. They are controlled independently. Very intelligent. the main guide rail of yt202s is also a high-end magnetic linear motor. it has high accuracy.

RFQ

Q: What is your actual speed of your products?

A: For the actual speed of the machine which is constrained by many factors, that related to the number of the components, the time to send PCB board and receive the board that will have influence on the speed when in production, and is decide for the actual products and needs.

Q: Can I go and see if you have sold the equipment to India?

A: Yes, we have sold our machine in India, but for the fact we can't decide it for our customer, but I will try to contact our customer. Hope you can understand, because no one wants their competitors to visit their manufacturing site.

Q: It's hard to use the machine?

A: Machine is very intelligent and easy to operate, like the intelligent phone, also the software is made by our company, so we know how to make it more intelligent and operate friendly.

Q: How is the breakdown rate of machine?

A: Our machine is very stable, the breakdown rate is less than 0.001.

Q: What's the terms of payment? What about the trade term?

A: T/T is OK. You can choose FOB Shenzhen.

Q: What is the difference between dual module and single module?
