Product Description

The old and new solder paste can be mixed About 35KG SMT machine

The machine features:

Maximum speed can reach 1000 rpm

When stirring, it is necessary to de-ice the solder paste beforehand;

Do not have to open the container;

Power single phase 220v;

No gas problem;

Does not destroy the shape of tin powder;

Fixtures are suitable for all kinds of 500g packaging solder paste cans;

Mixing time can be set arbitrarily;

Has manual speed control function

It can return the solder paste to temperature in a short time and fully stir the solid and liquid components in the solder paste to achieve a completely consistent density. The old and new solder paste can be mixed and stirred, and a more active new solder paste can be obtained, which can be used in the follow-up Shows good thixotropy in screen printing. The work efficiency and work quality are greatly improved, and the SMT printing process is simplified and standardized. The biggest advantage of closed stirring is the fixed running time and the flexibility of the solder paste (Q property).
