Tape Reel LED Strip Light Manufacturing Machine With Solder Paste Reflow Soldering

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: ETON
- Certification: CCC/CE
- Model Number: T9

Product Specification

- Machine Name: Led Strip Light Mounter
- Space Required: More Than 40m Length
- Quality: Good
- Brand: ETON
- Highlight: **SMT LED Strip Light Manufacturing Machine, LED Strip Light Manufacturing Machine, SMT led strip manufacturing machine**

for more products please visit us on smtmountingmachine.com

Product Description

Tape reel strip light machine

What is high quality tape led light strip ?

High-quality LED light strips are manufactured using solder paste and reflow soldering processes, so the solder joints on the light strips are smooth and the number is not large. The shape of the solder joint is generally arc-shaped, and the amount of solder is very uniform. Such a product proves to be produced by a regular process. The cleavage solder joints are at the origin or have tin tips, and the amount of solder is uneven, indicating that it is manual soldering

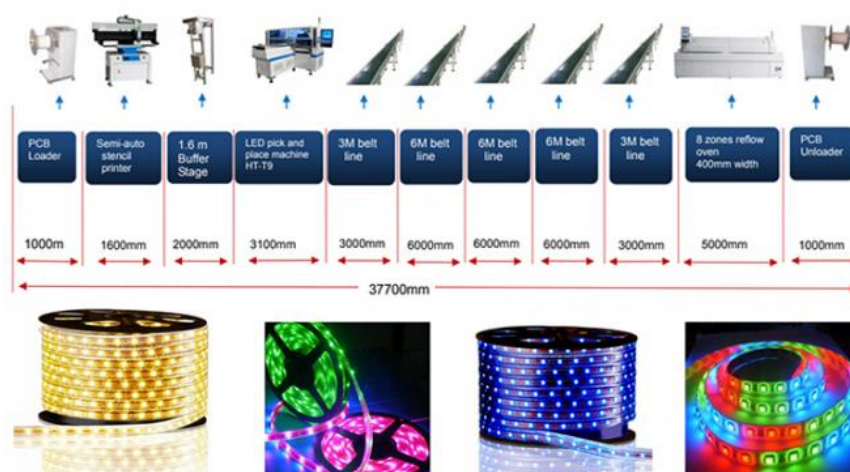

The FPC of the light strip has two types of rolled copper and copper-clad copper. The rolled copper and FPC are connected together, and the pads will not fall off when bent at will. The copper foil on the copper-clad board is protruding and can be seen with the naked eye. The connection point, if bent too much, will cause the pad to fall off. When purchasing, choose a light strip made of rolled copper

Surface cleanliness is also an important purchase method. The best production process of LED light strips is SMT. The surface of the light strips produced by SMT is extremely clean without any stains and impurities. And if it is not a product produced by SMT, there will be obvious cleaning marks and residual stains. It's even worse if it's a handmade product.

SMT Line machine for tape led strip light

Machine list	Machine name
Model 1	Loader machine
Model 2	Stencil printer machine
Model 3	Buffer machine
Model 4	Pick and place machine
Model 5	24m belt line
Model 6	Reflow oven machine
Model 9	Unloader machine
The whole line function is mounting led chip on the FPCB	

LED TAPE LIGHT SMT MACHINE

Multicolor led strip light,suitable for differernt length

Features of strip light smt line

T9 is the high speed mouter machine of ETON Brand. The features of this line is :

High speed mounting speed, 250000 chip per hour capacity, one hour could make around 1000 strip light
Good quality with high-end magnetic linear motor control , guarantee the precision and the machine lifetime
Intelligent for the components misplacement.

Professional design for roll to roll strip light, suitable for all kinds of length strip light
