

## 68 Heads SMT Pick And Place Machine Group Picking Group Placing For Flexible Strip

### Our Product Introduction

for more products please visit us on [smtmountingmachine.com](http://smtmountingmachine.com)

#### Basic Information

- Place of Origin: Guangdong China
- Brand Name: ETON
- Certification: CCC
- Model Number: HT-T9
- Minimum Order Quantity: 1 sets
- Delivery Time: 30 days
- Payment Terms: T/T

#### Product Specification

- L\*W\*H: 3100\*2300\*1550
- PCB SIZE: 250\*any Length
- Mounting Mode: Group Picking And Group Placing
- Highlight: 3014LED SMT Pick And Place Machine ,  
Group Placing Flexible Strip making machine ,  
Group Picking Flexible Strip making machine

## Product Description

### 一. Product Description

Dual arm magnetic linear highspeed mounter for flexible strip (no wire). It can mount wide components, including LED3014,3020,2835,5050 and suitable resistors,capacitors, bridge rectifier etc. Then products, like LED strip, can be achieved.

### 二. Parameters table

Brand	ETON
Model name	T9
Length*width*height	3100*2300*1550
Weight	1700
PCB size	250mm*any length
Mounting way	Group picking and group placing
Capacity	20W~50WCPH
Voltage	AC 380V 50Hz
Drive motor	High-end magnetic linear motor servo motor
No. of camera	5 sets
	Vision alighment ,Mark correction
No. of head	Double side:68PCS
No. of feeder station	Double side:136PCS
Warranty	1 year
Place of orgin	Guangdong, China

### 三. Feature

High productivity

ETON tech adjustable placement head.

Component picking position can be adjusted according to PCB pad pitch, min 6.5mm. unique design component leaking detection and indivisual component refill function: recognition camera record the component leaking position of PCB, and fill the missing component accordingly.

Ultra high speed capacity

The placement head adopt the measure of two times picking and once placing and thus the placement head is greatly minimized with the improved placement way, excellent optimum capacity reach 500000CPH.

Flexible production

Adjust the conveying platform according to roll to roll strip.range 250(±10mm), the max length range is 1M per cycle. The distance of feeder station can be adjusted to achieve group picking and group placing, so as to realize the function of two times picking and once placing.

The range of feeder station is double of placement head, producing four kinds of material at the same time. Intelligent electric feeder, supporting high-speed machine series.

### 四.Company belief

Eton just took 10 years to be the top smt machine supplier in China, which attest the ability of eton in

the smt field. The domestic market share and our exports to more than 30 countries again corroborate the credibility of eton to make you satisfied.

Eton is not only in the leading position in the photoelectric high-speed smt machine, but also has made breakthrough progress in the field of high-speed placement machines, which are widely used in lighting, LED display, electronics field, power deriver, home appliance, new energy and other industries.

Eton aims to "build a world- class enterprise, and is committed to continuously providing the market with products and services that are "more intelligent, more professional, more efficient, and lower

consumption. "

## 五. Package and Delivery

Packaging: standard export packaging or customized packaging.

Step 1. Pack the machine with foam cotton and then stretch the film to protect the outside of the machine

step 2. Put the desiccant in the vacuum trag to prevent moisture

Step 3. Professional wooden box packing

## 六. service

Pre-sale:

A. Provide professional advice on SMT production line.

B. Recommend the most suitable model according to the product.

C. Provide the best quotation at ex-factory price

After-sales:

A. Before shipment, the machine will be tested.

B. Provide machine-free installation training, video training and online training.

C. Professional after-sales team, solve problems in the first time.
