### FAQ

Q1: Is there any difference between your company's HT-E8S-1200 and HT-E8D-1200?

A: The two SMT mounter are functionally identical, except that the E8S is a single mode group SMT mounter, and the E8D is a dual mode group SMT mounter. The E8S has a production capacity of 45000 CPH, and the E8D has a production capacity of 90000 CPH, twice that of the E8S.

Q2: What are the differences between multifunctional SMT mounter and dedicated SMT mounter in the applied products?

A: The multifunctional machine is suitable for a variety of products, such as ball bubbles, display screens, drives, etc., with higher mounting accuracy, but at the same time, the mounting speed is slower compared to dedicated opportunities; The dedicated machine is mainly used for
