

100 Meters Strip Light Roll To Roll SMT Making Machine 500000 cph One year warranty

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: ETON
- Certification: CCC/CE
- Model Number: T9-2S

Product Specification

- Machine Name: Strip Light Mounter Machine
- Machine Speed: 500000 Cph
- Application: Any Length Of Strip Light
- Machine Warranty: One Year
- Highlight: roll to roll smt making machine,
100 Meters Strip SMT Making Machine,
Strip Light SMT Making Machine

Product Description

100 Meters Strip Light roll to roll smt making machine

Key name: 100M strip machine/ Strip making machine/ strip light smt machine/ roll to roll smt machine

How to make strip light ?

Roll to roll no wire strip light is special manufacturing steps:

1. SMT Line: Mounting led chip and resistor or other smd components on the FPCB (For this line will required prepare well the material : mainly for FPCB/Solder paste/SMD components)
2. Test Line: After SMT Line, you will got the FPCBA, so we need to test whole FPCBA by hitting and test the lighting, if there are the mistake mounting, the diod components problem, unlight, and other problem, the labor need to revise it in this step, so it is manily test by manully.
3. Splitting line: After the Test Line, the FPCBA need splitting into each single line roll to roll. It is using the splitting machine, very easy for operate. After this step, normally will have thousand meters single strip light.
4. Extrusion line: After splitting line, for waterproof and dust proof , will need to do the extrusion for the strip light. By this line, you could choose the pvc material or silicon material, also could make the Nenon light . Also with the laser marking machine, you could print your logo into the light, and also could cut any length according to your require. Like 100 Meters/200 Meters/etc
5. Rolling and Package: After extrusion line, the final step need to do is rolling and final test the lighting, and also need package well in a paper box.

Above are the main five step for making strip light. ETON is the top brand for the SMT Line manufacturer in China. We also are the first and excusive company design and make this kind of group picking and group mounting professional and high speed mounter machine. If you want to start strip light making, ETON is the best partner.

T9-2S

ROLL TO ROLL SOLUTION

Feature

1. Apply to 3012/3020/2835/5050 resistor, capacitor, bridge rectifier, etc.
2. ETON tech Adjustable Placement Head.
3. Unique Design Component Leaking Detection And Individual Component Refill Function.
4. Ultra-high-speed Capacity- excellent optimum capacity reach 500000CPH.
5. Intelligent electric feeder, supporting high-speed machine series.

SMT Line

ETON SMT MACHINE YOU DESERVE IT!

ETON SMT Mounter machine datasheet

| | |
|--------------|--|
| Machine name | Pick and place machine/smt machine/ chip mounter |
|--------------|--|

| | |
|----------------------|---|
| Machine function | Picking and mounting smd components on the fpcb |
| Machine dimension | 3500*3000*1800 MM |
| Machine speed | 500000 chip per hour |
| No.of heads | 136 PCS |
| O.P System | Software |
| No.of feeder station | 136 PCS |
| Power supply | 380AC 50HZ 6KW |
| Camera | 10 Sets of vision camera |
