

## 1M LED Strip Light Making Machine surface mounted SMT Production Line

### Our Product Introduction

#### Basic Information

- Place of Origin: China
- Brand Name: ETON
- Certification: CCC/CE
- Model Number: F9

#### Product Specification

- Machine Name: LED STRIP LIGHT MACHINE
- Application: LED Strip Light Led Tube Light
- Capacity: 250000 Cph
- Warranty: One Year
- Highlight: **1M LED Strip Light Making Machine, surface mounted Strip Light Making Machine, Light Making SMT Production Line**

## Product Description

### 1M LED Strip Light production line making machine

#### COB and SMD led strip light different

With the popularity of the 'no main light lighting' design concept, LED linear light strip products are becoming more and more popular in home decoration and whole-house customization projects. Here are two LED flexible light strip products, one is an ordinary SMD LED light strip, the other is the latest COB LED strip.

SMD LED Strip light : smd mean surface mounted devices, this is most popular led components. Using smt machine mounting on the FPCB. And LED strip light is hot popular during to the multifunctional application. SMD LED chip have many sides: 3528, 5050, 2835, 3014, 2216, 2110 etc.

COB Strip light: this is a new light with no soldering, no smt machine with no smd devices. Lighting look more flexible without a big led chip, but the warranty for this lighting now is a question.

Some perfect to using SMD LED, some perfect to using the cob csp led light due to the cheap price. No matter which one all have the special features.

### FAQ

1. What should I buy for the 1M strip light line?

A: For smd led strip light will need smt line and assembly line

2. What is your lighting warranty ?

A: ETON is a brand of smt machine, for the lighting warranty it is influenced by other factors , like the fpcb quality, the led chip quality, etc.

3. Could we make 100 meters strip light by your machine ?

A: Yes, we have the professional machine for hundreds meter strip light manufacturing

4. If I want to make led bulb and strip light both at the same time, may i ?

A: Yes, we have middle speed mounter multifunctional for mounting different type led lighting product and electrical product at the same time

5. How to do Reflow soldering machine maintenance ?

Maintenance of reflow soldering shell: wipe the surface of the machine with a soft cloth

Reflow soldering track maintenance: visually inspect the chain for jitter and deformation.

Reflow soldering fan maintenance: Use a vacuum cleaner to clean the dust from each exhaust port on the casing.

Maintenance of reflow soldering screw: Check if there are any debris on the width adjustment wire and clean it.

Clean the reflow sensor: Use a soft cloth to wipe off the dust on the front and rear sensors of the furnace.

Reflow soldering conveyor belt maintenance: Use an oil dripper to add high-temperature oil to the conveyor chain, the amount is 12~2/3 of the oil bottle volume per chain

Abnormal noises during reflow soldering operation: When the chain is rotating normally, there are abnormal noises.

Maintenance of screws on the surface of the machine: If any looseness or falling is found during daily inspection, notify the technician immediately

The floor under the reflow soldering machine: Visually inspect the floor under the reflow soldering oven and clean it in time if there is any foreign matter.
