### The Intention Of LED

In recent years, LED has developed extensively and rapidly, which is not only due to its own advantages, but also related to the development of Internet technology, the progress of digital technology and the application of big data.

Looking ahead to 2022, it is expected that the global LED industry will further increase its market demand under the influence of "house economy", and China's LED industry will benefit from the effect of substitution and transfer. On the one hand, due to the impact of the global epidemic, people are going out less, and the market demand for indoor lighting and LED display continues to strengthen, injecting new vitality into the LED industry.
