## The advantages of SMT patches are as follows

### 1. Small size and light weight

The volume and weight of SMT components are only about 1/10 of those of traditional plug-in components, which is convenient for mounting. Generally, after SMT chip processing, the volume of electronic products can be reduced by 40% to 60%, while the weight can also be reduced by 60% to 80%.

### 2. Increased efficiency and reduced costs

SMT patch processing is easy to achieve automation, improve production efficiency, save materials, energy, equipment, manpower, time, etc., and reduce costs by 30% to 50%.

3. High reliability and strong seismic resistance
4. Good high-frequency characteristics, reducing electromagnetic and radio frequency interference
5. Low solder joint defect rate
6. High mounting density
