## Product Description

### High speed SMT glue dispenser machine 90000 capacity

#### Description

The glue dispenser is also called the glue spreader, which specifically controls the fluid. The automatic machine that drips and coats the fluid on the surface of the product or the inside of the product can realize three-dimensional and four-dimensional path dispensing, precise positioning, precise control of glue, no drawing, no leakage, no glue. The glue dispenser is mainly used to accurately point, inject, apply and drop glue, paint and other liquids in the product process to the precise position of each product. It can be used to achieve dot, line, round or arc shape.
